   Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 DB seq

polymorphic outer membrane protein g family - Chlamydophila pneumoniae (str C; Species: Chlamydophila pneumoniae, Chlamydia pneumoniae
C; Date: 23-Apr-1999 #sequence_revision 23-Apr-1999 #text_change 05-May-2000
C; Accession: D72077
R; Kalman, S; Mitchell, W; Marathe, R; Lammel, C; Fan, J; Olinger, L.;
Nature Genet: 21, 385-389, 1999
A; Title: Comparative genomes of Clamydia pneumoniae and C. trachomatis.
A; Reference number: A72000; MUID:99206606
A; Accession: D72077
A; Status: preliminary
A; Molecule type: DNA
A; Residues: 1-928 < ARN>
A; Cross-references: GB:AE001628; GB:AE001363; NID:g4376730; PIDN:AAD18593.1
A; Experimental source: strain CWL029
C; Genetics:
A; Gene: pmp_11
